

****User Story 6: Leave Application (continuation)****

As an employee, I want to apply for leave so that I can take time off.

Test Cases (Gherkin):

...

Scenario: Successfully apply for leave

Given the employee is logged in

And the employee navigates to the "Leave" section

When the employee selects the leave type, from date, to date, and fills in all required fields

And clicks the "Apply" button

Then the system should submit the leave request

And the request status should be pending approval

Scenario: Apply leave with missing required fields

Given the employee is logged in

And the employee navigates to the "Leave" section

When the employee leaves the from or to date field empty

And clicks the "Apply" button

Then an error message should indicate that the date fields are required

Scenario: Apply leave with insufficient balance

Given the employee is logged in

And the employee navigates to the "Leave" section

When the employee applies for more leave days than available

Then the system should display an error message indicating insufficient balance

Scenario: Leave date range validation

Given the employee is logged in

And the employee navigates to the "Leave" section

When the employee selects a "To Date" earlier than the "From Date"

And clicks the "Apply" button

Then the system should display an error message indicating invalid date selection

Scenario: Leave application with comments

Given the employee is logged in

And the employee navigates to the "Leave" section

When the employee fills all fields and adds comments

And clicks the "Apply" button

Then the system should save the comments along with the leave request

```

---

### \*\*User Story 7: Approve/Reject Leave Requests (Admin)\*\*

As an admin, I want to approve or reject leave requests so that I can manage employee leave efficiently.

#### Test Cases (Gherkin):

```

Scenario: Successfully approve a leave request

Given the admin is logged in

And the admin navigates to the "Leave" approval section

When the admin selects a leave request

And clicks the "Approve" button

Then the leave status should be updated to "Approved"

Scenario: Reject a leave request

Given the admin is logged in

And the admin navigates to the "Leave" approval section

When the admin selects a leave request

And clicks the "Reject" button

Then the leave status should be updated to "Rejected"

Scenario: View details of a leave request before approval

Given the admin is logged in

And the admin navigates to the "Leave" approval section

When the admin clicks on a specific leave request

Then the system should display the leave details including type, date range, and reason

Scenario: Approve leave with insufficient balance

Given the admin is logged in

And the admin navigates to the "Leave" approval section

When the admin selects a leave request with insufficient balance

And clicks the "Approve" button

Then the system should display an error message indicating insufficient leave balance

Scenario: Automatic notification after leave approval

Given the admin has approved a leave request

When the employee logs in

Then the system should notify the employee of the leave approval in the notifications section

\\

User Story 8: Employee Profile Update

As an employee, I want to update my profile information so that my contact details and personal information are accurate.

Test Cases (Gherkin):

\\

Scenario: Successfully update employee profile

Given the employee is logged in

And the employee navigates to "My Info" section

When the employee updates their personal details (name, address, phone number)

And clicks the "Save" button

Then the system should save the updated information

Scenario: Profile update with missing required fields

Given the employee is logged in

And the employee navigates to "My Info" section

When the employee clears any required fields (e.g., first name)

And clicks the "Save" button

Then the system should display an error indicating the required fields

Scenario: Update profile with invalid phone number format

Given the employee is logged in

And the employee navigates to "My Info" section

When the employee enters an invalid phone number format

And clicks the "Save" button

Then the system should display an error message for invalid phone number

Scenario: Cancel profile update

Given the employee is logged in

And the employee navigates to "My Info" section

When the employee makes changes to the profile

And clicks the "Cancel" button

Then the system should discard all unsaved changes

Scenario: Upload profile picture

Given the employee is logged in

And the employee navigates to "My Info" section

When the employee uploads a new profile picture

And clicks the "Save" button

Then the system should update and display the new profile picture

...

User Story 9: Time Sheet Submission

As an employee, I want to submit my timesheet so that my work hours can be tracked.

Test Cases (Gherkin):

`, `

Scenario: Successfully submit a timesheet

Given the employee is logged in

And the employee navigates to the "Time" section

When the employee enters valid time data for each day of the week

And clicks the "Submit" button

Then the timesheet should be submitted successfully

Scenario: Submit timesheet with missing entries

Given the employee is logged in

And the employee navigates to the "Time" section

When the employee leaves some days without entering time

And clicks the "Submit" button

Then the system should display an error message indicating incomplete timesheet

Scenario: Edit timesheet before submission

Given the employee is logged in

And the employee navigates to the "Time" section

When the employee edits an existing time entry before submission

And clicks the "Submit" button

Then the updated timesheet should be saved and submitted

Scenario: View submitted timesheet status

Given the employee is logged in

And the employee navigates to the "Time" section

When the employee views a previously submitted timesheet

Then the system should display the status as "Pending Approval" or "Approved"

Scenario: Submit timesheet with overtime

Given the employee is logged in

And the employee navigates to the "Time" section

When the employee enters overtime hours for a day

And clicks the "Submit" button

Then the system should include overtime in the timesheet for approval

```

---

**\*\*User Story 1: Login Functionality\*\***

As a user, I want to log in to the OrangeHRM system so that I can access my dashboard.

#### Test Cases (Gherkin):

```

Scenario: Successful login with valid credentials

Given the user is on the login page "https://opensource-demo.orangehrmlive.com/web/index.php/auth/login"

When the user enters valid credentials

And clicks the "Login" button

Then the user should be redirected to "https://opensource-demo.orangehrmlive.com/web/index.php/dashboard/index"

Scenario: Unsuccessful login with invalid credentials

Given the user is on the login page "https://opensource-demo.orangehrmlive.com/web/index.php/auth/login"

When the user enters invalid credentials

And clicks the "Login" button

Then an error message should be displayed on the login page

Scenario: Login with empty fields

Given the user is on the login page "https://opensource-demo.orangehrmlive.com/web/index.php/auth/login"

When the user leaves the username and password fields blank

And clicks the "Login" button

Then an error message should indicate that both fields are required

Scenario: Password recovery link visibility

Given the user is on the login page "https://opensource-demo.orangehrmlive.com/web/index.php/auth/login"

Then the "Forgot your password?" link should be visible to the user

Scenario: Remember me option functionality

Given the user is on the login page "https://opensource-demo.orangehrmlive.com/web/index.php/auth/login"

When the user checks the "Remember me" checkbox

And enters valid credentials

Then the system should remember the login details for the next session

...

User Story 2: Dashboard View

As a user, I want to view my dashboard after logging in so that I can access my work information and tasks.

Test Cases (Gherkin):

...

Scenario: Dashboard displays after successful login

Given the user has successfully logged in

And is redirected to "https://opensource-demo.orangehrmlive.com/web/index.php/dashboard/index"

Then the dashboard should display relevant sections like leave balances, tasks, and notifications

Scenario: Notifications section visibility on dashboard

Given the user is on the dashboard page "https://opensource-demo.orangehrmlive.com/web/index.php/dashboard/index"

Then the notifications section should be visible at the top-right of the dashboard

Scenario: View leave balances on dashboard

Given the user is on the dashboard page "https://opensource-demo.orangehrmlive.com/web/index.php/dashboard/index"

When the user views the "Leave" section

Then the correct leave balances should be displayed

Scenario: Access tasks from the dashboard

Given the user is on the dashboard page "https://opensource-demo.orangehrmlive.com/web/index.php/dashboard/index"

Then the task section should show any assigned tasks for the user

Scenario: Navigate from dashboard to other sections

Given the user is on the dashboard page "https://opensource-demo.orangehrmlive.com/web/index.php/dashboard/index"

When the user clicks on the "Leave" menu in the dashboard

Then the system should navigate the user to the "Leave" module

...

User Story 3: Employee Directory

As an admin, I want to search for employees in the employee directory so that I can view their details.

Test Cases (Gherkin):

...

Scenario: Search for an employee by name

Given the admin is logged in and on the employee directory page

When the admin enters an employee's name in the search bar

And clicks the "Search" button

Then the system should display the matching employee's details

Scenario: Search for employees by department

Given the admin is logged in and on the employee directory page

When the admin selects a department from the department dropdown

And clicks the "Search" button

Then the system should display employees who belong to that department

Scenario: View employee details after search

Given the admin is on the employee directory page after a successful search

When the admin clicks on an employee's name

Then the system should display the employee's full profile details

Scenario: No results found for an invalid search

Given the admin is on the employee directory page

When the admin searches for a non-existent employee

Then the system should display a "No results found" message

Scenario: Reset search filters

Given the admin is on the employee directory page with active search filters

When the admin clicks the "Reset" button

Then all search fields should be cleared and the employee directory should refresh to the default view

...

User Story 4: Add Employee

As an admin, I want to add a new employee to the system so that the employee can be tracked and managed in the HR system.

Test Cases (Gherkin):

...

Scenario: Successfully add a new employee

Given the admin is logged in and navigates to the "Add Employee" page

When the admin fills out all required fields including first name, last name, and employee ID

And clicks the "Save" button

Then the system should create the employee and display the employee details in the directory

Scenario: Add employee with missing required fields

Given the admin is logged in and navigates to the "Add Employee" page

When the admin leaves the first name or last name field empty

And clicks the "Save" button

Then an error message should indicate the missing required fields

Scenario: Add employee with a duplicate employee ID

Given the admin is logged in and navigates to the "Add Employee" page

When the admin enters an existing employee ID

And clicks the "Save" button

Then the system should display an error indicating a duplicate ID

Scenario: Add employee with login credentials

Given the admin is logged in and navigates to the "Add Employee" page

When the admin checks the "Create Login Details" option

And enters a valid username and password

Then the system should create login credentials for the new employee

Scenario: Cancel adding employee

Given the admin is on the "Add Employee" page

When the admin clicks the "Cancel" button

Then the system should discard any unsaved data and return to the employee list

...

User Story 5: Edit Employee Information

As an admin, I want to edit an existing employee's information so that their details remain up to date.

Test Cases (Gherkin):

...

Scenario: Successfully edit employee information

Given the admin is logged in and navigates to an employee's profile page

When the admin edits fields such as phone number, address, or job title

And clicks the "Save" button

Then the updated information should be saved and reflected in the employee's profile

Scenario: Edit employee with missing required fields

Given the admin is on an employee's profile page

When the admin removes required fields like first name or last name

And clicks the "Save" button

Then an error message should indicate the missing required fields

Scenario: Edit employee and cancel changes

Given the admin is on an employee's profile page

When the admin makes changes but clicks the "Cancel" button

Then no changes should be saved and the page should return to the previous state

Scenario: View updated employee details after editing

Given the admin has successfully edited an employee's information

When the admin views the employee's profile

Then the updated details should be displayed

Scenario: Error when entering invalid data during edit

Given the admin is on an employee's profile page

When the admin enters invalid data such as a phone number in the address field

And clicks the "Save" button

Then the system should display an error message for invalid data

...
